PROFESSIONAL SUMMARY

Full-stack software engineer with over 4 years of experience designing and building web applications using React and ASP.NET Core. Skilled in relational database design with SQL Server, RESTful API development, and leading small project teams from requirements through delivery. Comfortable working across the stack, from UI implementation to backend architecture and cloud deployment.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL

Frameworks & Libraries: React, ASP.NET Core, Entity Framework Core, Node.js, Tailwind CSS

Databases: SQL Server, PostgreSQL, MongoDB

Tools & Practices: Git, Docker, Azure DevOps, Agile/Scrum, Project Management, REST API Design, Unit Testing

WORK EXPERIENCE

Software Engineer — Ceylon Digital Systems, Colombo

Jan 2022 – Present

- Led development of an internal HR management web application using React and ASP.NET Core Web API, reducing manual HR processing time by roughly 30%.
- Designed and implemented a normalized SQL Server schema supporting over 15 related entities, using Entity Framework Core migrations for version control.
- Built and secured RESTful APIs with JWT-based authentication and role-based access control for three distinct user roles.
- Mentored two junior developers and coordinated sprint planning as part of a 5-person Agile team.

Junior Software Developer — Lanka Web Solutions, Colombo

Jun 2020 – Dec 2021

- Developed responsive front-end components in React for a customer-facing e-commerce platform serving 10,000+ monthly users.
- Collaborated with backend engineers to integrate REST APIs and resolve cross-browser compatibility issues.
- Participated in code reviews and wrote unit tests to improve overall test coverage from 40% to 65%.

EDUCATION

BSc (Hons) in Information Technology — NSBM Green University, Sri Lanka (2016 – 2020)

GCE Advanced Level — Physical Science Stream — Ananda College, Colombo (2015)

PROJECTS

- Recruitment Analytics Dashboard (Personal Project):** Built a small analytics tool using React and Chart.js to visualize hiring funnel data from a mock dataset.
- Task Tracker API:** Designed a RESTful task management API in ASP.NET Core with SQL Server, deployed on Azure App Service.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- freeCodeCamp — Responsive Web Design Certification
